

WORKSHOP 3 OF 3 • CYBER ATTACK CHALLENGE

Prove it. The Challenge.

Teams. Real vulnerabilities. One clock. Everything you learned this week, now you compete.

Mohamed Medjahdi, Cybersecurity Engineer

7-77 Digital Skills Programme • Algérie Télécom SkillsCenter, Saïda

How it works. Simple.

1 · HUNT

Find bugs, your way

No step-by-step. Recon, question every input, exploit. Any order, your pace.

2 · PROVE

Call me over

Raise a hand, show the find, tell me how you got it. I'll give hints as you go.

3 · REPORT

Write it up

A short report per finding: what, steps, impact, fix. That's what pays.

Teams of 2 or 3. No laptop? Pair up. You score on **exploit + explain + report**, never just the payload.

first · setup 5 points

Get your lab running.

Run Juice Shop and open it in Burp. **5 points** for a working local setup. When the clock hits zero, I share my address for anyone still stuck.

```
docker run --rm -p 3000:3000 bkimminich/juice-shop
```

```
in Burp: localtest.me:3000
```

SETUP TIME

10:00

Start

Reset

YOUR FIRST MOVE

Find the hidden **Score Board**.

Juice Shop hides a page that tracks every challenge and its points. It isn't in the menu. Find it, and the whole hunt opens up in front of you. That's recon: finding what the site doesn't advertise.

the board is open • hunt freely

Find what you can. Any order. Call me over to score.

Normal XSS

make the site run your code (a popup)

10

XSS with real impact

expose the victim's session / token

20

SQL injection

log in as admin with no password

20

Crack the admin's password

decode the token, follow the trail, crack it

25

Read the code

Find It + Fix It on a challenge you solved

10

each scored on exploit + explain + report • method bonus up to +10

HUNT TIME

45:00

Start

Reset

last · the deliverable **report points**

Write your findings.

Pick your best bugs and write a clean report for each: **what**, **steps to reproduce**, **impact**, **fix**.
Use AI to draft, then check every line. This is what a company actually pays for.

what

steps

impact

fix

REPORT TIME

THE WHOLE WEEK, YOURS TO KEEP

Take it all with you.

Every slide, the setup guide, the payloads, and a full roadmap to keep going, all free, forever. Scan the code and it's yours.

Everything from all three days lives at medjahdi.dev/src

ONE WEEK. ZERO TO THIS.

**You didn't just learn it.
You **did** it.**

Keep the mindset. Follow the roadmap. This was only the beginning.
